

Custom Rulers Any Measurement

Front & Back

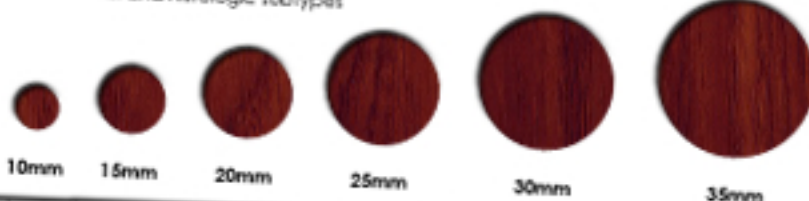

Rulers 1,000 pc. min.

- Exclusive 4/C process printing directly on thick plastic
- High gloss finish
- Custom diecut

MALIGNANT NEOPLASMS (Tumors)

Most common human cancer; more than 400,000 new patients annually found most commonly on sun-exposed areas of fair-skinned, sun-damaged individuals. Translucent, "pearly" or "waxy" papules; associated telangiectasia; sometimes central ulceration. Locally destructive; very rarely metastasizes; can cause death. Sun-exposure, ionizing radiation, immunosuppression are all predisposing factors. Several clinical and histologic subtypes.
